

ACTION TAKEN REPORT

Online feedback for the 2020-2021 academic year was collected from stakeholders and thoroughly analyzed. The findings indicated that most parameters of the student satisfaction survey were at satisfactory levels. The IQAC and Deans committee praised the faculty members for their hard work. However, the committee recommended increasing opportunities for internships, student exchanges, placements, and field visits for students. These suggestions were communicated to the departments and clubs during the HoDs meeting.

During the online staff meeting, it was emphasized that staff members should work on enhancing their communication skills and improving their use of teaching aids. Additionally, extracurricular activities were incorporated for students. Teachers were advised to focus on soft skill development sessions, both organized internally and externally. Given that classes were conducted online, it was also recommended to use more illustrations and examples to help students better understand the concepts. Teachers were advised to ensure that every student has a clear understanding of Course Outcomes (COs) and Program Outcomes (POs).
