

RAIN WATER HARVESTING

Rain Water Harvesting is practiced on campus. In this system, the rain water is channelized and directed to the plants in the garden and also used for cleaning purposes. This helps the college stay green and vegetative.

MAINTENANCE OF WATER BODIES & DISTRIBUTION SYSTEM IN THE CAMPUS

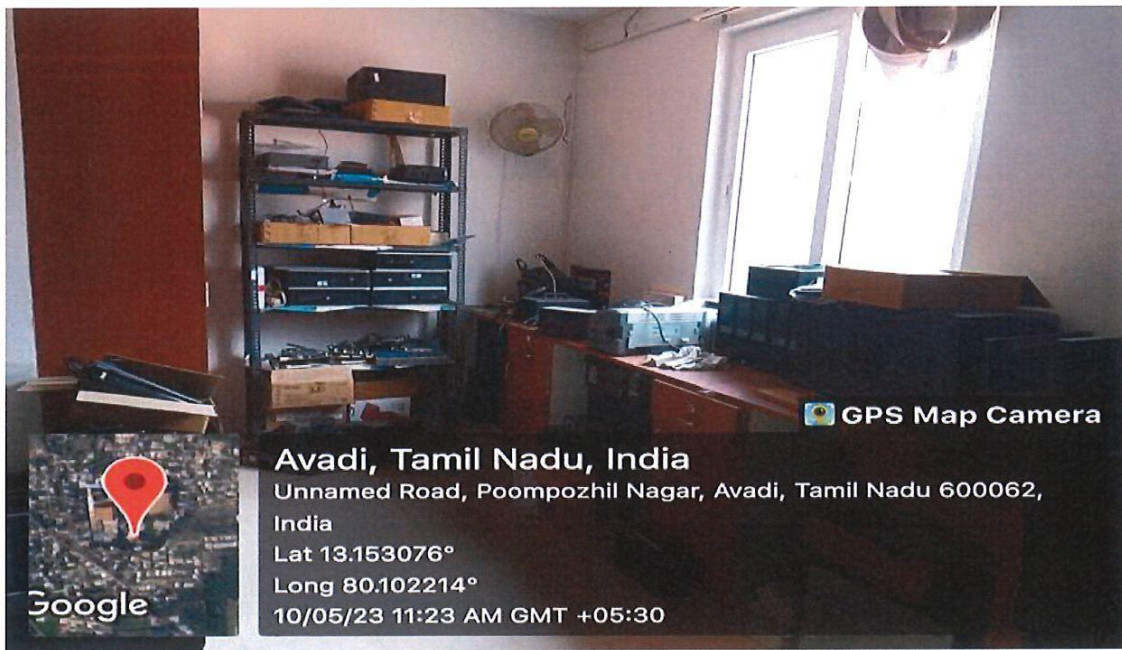

Facilities in the Institution for the management of the following types of degradable and non-degradable waste

● **SOLID WASTE MANAGEMENT**

Solid waste disposal is managed in collaboration with the local municipality. The dry and wet wastes are segregated in different color dustbins. The housekeeping staff is trained every semester to segregate waste on campus. The municipality collects the waste every alternate day. The wooden furniture of the college is repaired, replaced, or up cycled every year. Collected and recycled by outside agencies. The use of plastic waste papers are bags within the premises of the college is prohibited.

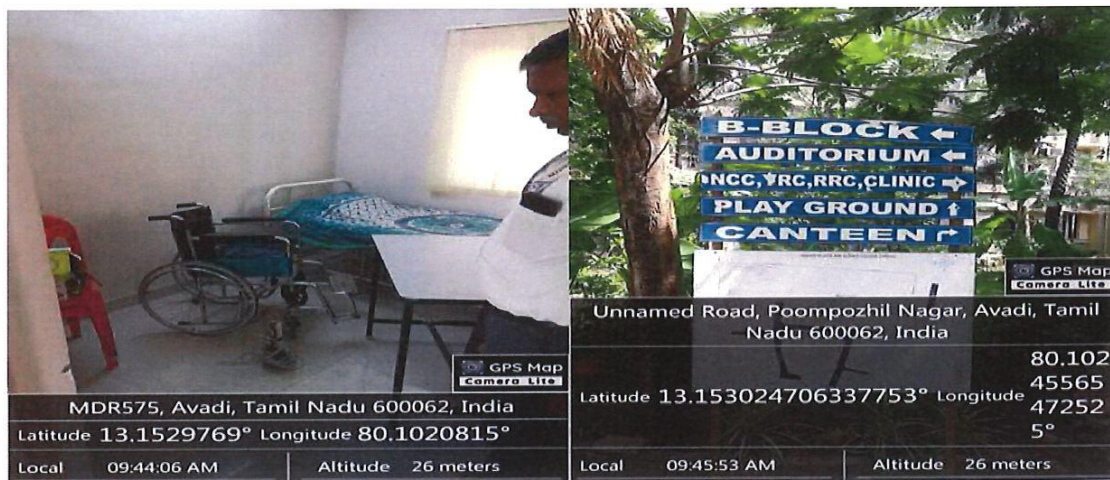

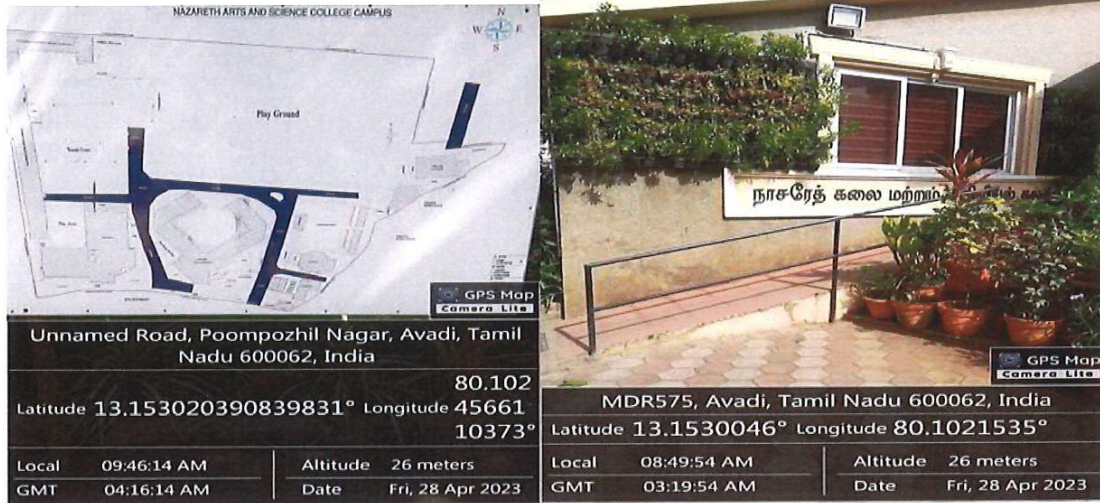

● **E-WASTE MANAGEMENT**
